PROFESSIONAL SUMMARY

Detail-oriented Software Tester with hands-on experience in manual testing of web applications and CRUD-based systems. Skilled in requirement analysis, test case design, defect reporting, and regression testing. Currently learning test automation fundamentals with a strong understanding of SDLC, STLC, and bug life cycle. Background in front-end development helps in identifying UI, usability, and functional issues effectively.

SKILLS

Manual Testing:
Requirement analysis, test planning, test case writing, test execution, regression testing, smoke testing, sanity testing, UI testing, functional testing

Bug Management & Tools:
Jira (bug reporting and tracking), Zephyr (test cases), Chrome DevTools, Postman (basic API testing), Git/GitHub

Automation (Learning):
Playwright basics, test automation concepts, locator strategies, automation framework understanding

Technical Knowledge:
HTML, CSS, JavaScript (for UI validation), basic Java, C++, SDLC, STLC

QA PROJECTS

Web Application Manual Testing (CRUD Application):
Performed manual testing on a web-based CRUD application. Designed and executed test cases, reported defects in Jira with severity and priority, and performed regression testing after fixes.

Live Website Manual Testing Assignment:
Conducted end-to-end testing on a live website. Tested forms, validations, and navigation flows, reported UI and functional issues, and prepared test documentation

EDUCATION

BS Software Engineering (Ongoing), *Islamia College & University*, Peshawar (Nov 2023 – Jul 2027)

HSSC, *Govt College*, Peshawar (2021 – 2023)
